

Contaminated Land Assessment and Remediation

Senversa combines extensive internal and external resources with detailed local knowledge to deliver quality work and innovative solutions. We are committed to the continual career development of our staff, ensuring they are trained to the highest standards and employ the most up to date assessment and remediation techniques.

Our land contamination assessment team is comprised of industry leading experts and Environmental Auditors with extensive experience across Australia and internationally. We enjoy the challenge of assessing complex contaminated sites and utilise the multi-disciplinary skills across our team to assess and identify potential site risks.
